

MUSSE & CLOUD

Musse&Cloud is a fashion footwear Spanish brand. Its aim is to offer affordable shoes made from the finest materials, without compromising on comfort.

It was created in 2014 with a mediterranean, curious and spontaneous spirit, inspired by the Beat Generation and its lifestyle.

Most of its products are designed and produced in Spain using high quality leathers and paying attention to detail. Throughout the process, Musse&Cloud is committed to the continuous improvement to achieve the greatest comfort in its trendy designs. Designs that transform in combination with the raw materials to tell different stories. Studs, buckles of different styles and finishes, braids, laces, and zippers: endless possibilities to convey the essence of Musse&Cloud in every design.

Design and technology come together to create a product that stems from everyday life, the care for the smallest details and the need for comfort.

Technology for comfort is its added value. Musse&Cloud created a new technology to make shoes so comfortable that women will enjoy every step they take.

Since the 2017 autumn-winter collection, Musse&Cloud has incorporated the Float System insole in its collection. This insole absorbs the impacts at every step and adapts to the foot anatomy providing anti-fatigue comfort.

During 2018 spring-summer collection, Musse&Cloud launched the Flex Line technology. With the Flex Line handmade design its shoes feel like a glove. This technology makes footwear: softness, extra-light, 100% flexible and 100% breathable. It is used in the collection of babouches and mules.

Musse&Cloud is a young brand growing fast, with a solid presence in Spain and well established in countries such as United States, France and Italy.

Musse&Cloud is aimed at adult, modern women between 25 and 40 who seek affordable and high quality leather footwear and don't want to give up on comfort. Women who identify with femininity, courage and the spirit of freedom.
